

Product Overview
eFileBOSS – Online file and document manager
www.efileboss.com

Introduction

eFileBOSS is a simple and very reliable way to share your important files with colleagues, vendors and clients. If you are looking for a cost-effective way to increase productivity by improving the way you distribute information within your organization, eFileBOSS is the ideal solution.

Never worry again about size restrictions of email attachments, complicated ftp programs, or the need to invest in expensive hardware and software. You can enjoy the freedom and flexibility of instant on-demand access to your data from any computer with an internet connection.

Product Features

- ▣ **Instant retrieval and delivery** - Access your files anytime, from anywhere and instantly share them with anyone you choose
- ▣ **Secure online storage** - files are stored on secured, monitored servers with SSL document encryption and daily offsite backups
- ▣ **Quick installation and setup** - requires no special hardware or software just a computer with an internet connection
- ▣ **Multiple file versions** - Track revisions and updates on documents that are being edited by several users - revisions renamed with a version number
- ▣ **Easy backup and unlimited usage** - Organize and protect as many files as you need; no risk of losing important documents due to computer problems
- ▣ **Unlimited users and groups** - Create as many users and group accounts as your organization requires. By separating users into groups and creating separate accounts for each, you can easily coordinate a massive collaboration effort and simplify the process of associating important documents with their relevant projects
- ▣ **Coordinate and collaborate** - Easily manage marketing campaigns and sales drives, organize team projects, notify users when files have been uploaded or modified. Reduce the time and effort required to keep your team updated with the file notification and instant delivery capabilities of eFileBOSS.
- ▣ **Real cash savings** - Eliminate high costs associated with excessive printing, postage, and lost time spent storing, sending, and searching for files. No more standing in line at the copy machine or mailing copies of documents to several locations. Spend less money on file management issues more time maximizing profits!

System Security

In creating the eFileBOSS application, the most trusted and tested programming practices were employed. Consideration was made for buffer overflows, SQL injection, and the user permission of the files stored on the web server.

Since the application is designed to handle information and files that are potentially sensitive in nature, SSL encryption is used. SSL or “secure socket layer” has become the web standard for transferring secure encrypted web pages. Users can be confident in knowing that if by chance their transmissions over the Internet were to be intercepted, their data cannot be read.

Product Pricing

For as little as \$14.95 per month you can have your own eFileBOSS account setup on our secured servers. Simply link to your account from your website or place the login directly on your existing pages. FREE account setup.

Custom installation of eFileBOSS on your own server - Starting at \$129 and ranging depending on your server type and PHP version. Includes 30 days email technical support.

Developers and resellers or companies wishing to customize the system themselves can receive the enterprise package and supporting documentation for a flat fee. In addition, phone support and yearly licenses for system upgrades can also be purchased.

Company Profile

The eFileBoss product and online service is a development project created by the design team of the Florida-based firm Royalblak Design Studios. In addition to customized web application development, we provide a wide range of clients with web hosting and high quality graphic design services for digital or print media.

Initially launched in mid 2004, the eFileBoss product is constantly being improved to meet the changing needs of the user. Our team is dedicated to developing an application that is secure, easy to use and so reliable, it can become an integral part of your daily document management activities.

eFileBOSS *fast.reliable.secure*
